

ADVANTAGES

- Available in a plastic frame
- Fully incinerable
- Pre-filter with long life and low and stable pressure drop

Application	Suitable for industrial environments with large amounts of coarse dust, including installations exposed to turbulence and/or recurrent high humidity Pre-filter for gas turbines, large industrial air compressors, diesel & gas engines, generators & enclosures
Frame	Galvanised steel;ABS
Gasket	Polyurethane;Neoprene;Flat gasket
Media	Polyester
Rec. final pressure drop	250 Pa
Max Temperature (°C)	70°C
Relative Humidity max	100%
Installation Options	Separate bank, from upstream or downstream side
Comment	Additional product features: Optimized filter area with conical filter bags Durable media High dust holding capacity Low-pressure drop Fully incinerable Galvanized frame, also available in a plastic frame Different pocket sizes available on demand

Hi-Cap GT is a high quality filter, available for the removal of coarse particles. It allows for a secure and efficient filtration in industrial environments where large amounts of dust are present. Long experience and continuous R&D has optimised the product for impressive filtration at a low cost.
